

Splash

Porous rubber surfacing for splash parks and pool surrounds with antibacterial properties

playtop®

SAFER SURFACING

Performance Characteristics

Playtop Splash, specifically designed for spray parks and pool surrounds features antibacterial properties, provides comfortable cushioning for its barefoot users of all ages and can, due to great variety of colour options, integrate itself visually into any existing design and environment.

Alongside performance testing, Playtop Splash has also been tested for hydrolysis and resistance to chlorine and sea water.

Playtop Splash has been developed using only high-quality components and should only be installed onto new or existing concrete or tarmac.

Areas for use

Features and Benefits

- Fully tested
- Environmentally friendly
- Durable
- Flexible
- Multiple colour options
- Low maintenance
- UV resistance
- Water permeable
